

SPT100 Personal Tracking

Measuring only 49x76x25mm the SPT100 Personal Tracking System is easily worn on a lanyard, belt clip or wrist band.

The SPT100 uses the latest high accuracy SIRF3 GPS Technology and is powered by a rechargeable battery lasting up to 60 hours.

The SPT LCD Screen displays, Time and GPS Lat/Long. There are also 3 Speed Dial numbers to make and receive phone calls and an SOS button which will send SMS Alerts to 5 mobile phones and also to a Data Centre for security monitoring.

Included is a 100,000 event blackbox recorder which may be set to record GPS positions every second or 15 metres travelled, and a separate real time tracking buffer which may be programmed on time or distance over the internet. The real time track buffer also automatically stores and forwards any information obtained outside GPRS coverage areas

IntelliTrac Data Centre

Connect Via Internet

- SOS Alerts SMS to 5 mobile Phones
- 3 Speed Dial Phone Numbers for Voice Communications
- Receive Incoming Calls

- Real Time Tracking
- Receive SOS Alerts
- Receive Movement Alerts
- Receive Zone Entry/Exit Alerts
- Management Reports
- Replay Journeys

X1 Vehicle & Asset Tracking

IntelliTrac X1 - is the entry level vehicle tracking system within the IntelliTrac family.

Approximately the size of a cigarette packet, the X1 packs a technology punch and is suitable for most tracking applications.

Features include:- The ability to track in real time over the internet, a 60,000 event black box recorder and a backup battery that will last up to 3 days, logging data every second of the day, ability to monitor 4 inputs and control 4 outputs, and the ability to integrate voice and data!

X1 is available in many derivatives including:- a water resistant version, a portable version and a wearable personal tracker.

- Monitor 4 Inputs Such As:-**
- Ignition On/Off
 - Door Openings
 - SOS Button
 - Alarm Trigger
- Control 4 Outputs Such As:-**
- Door Lock
 - Door Unlock
 - Immobiliser Engine
 - Flash Lights
- 1 RS232 Serial Data Port**
1 Voice Channel
10 Prog Alerts & Actions
10 Hardware Geofences Alerts

IntelliTrac X1 GPS Tracking Device covertly mounted within vehicle

- Battery Level Monitoring
- Towing Alert
- Speeding Alert
- 60,000 Event Blackbox Recorder
- Store & Forward Track Buffer
- GPS Odometer Reading

X8 Vehicle & Asset Tracking

IntelliTrac X8 - is the flagship within the product line and sets the global benchmark for GPS Tracking devices.

Features include:- The ability to track in real time over the internet, a 60,000 event black box recorder logging data every second of the day, ability to monitor 8 inputs, plus 2 Analog inputs for temperature, pressure, weight, fuel monitoring etc. and control 8 outputs. Also the ability to integrate voice and two data ports for integration to data terminals, Pc's, Driver RFID Cards, and Bluetooth Dongles.

X8 is an extremely versatile platform. For more information please refer to an IntelliTrac product specialist.

- Monitor 8 Inputs**
Monitor 2 Analog Digital Inputs
Example:- Temperature, Weight, Pressure, Fuel Levels
- Control 8 Outputs**
2 RS232 Serial Ports
1 Voice Channel
100 Prog Alerts & Actions
100 Hardware Geofences
100 Time Day Schedules
Ability to SMS 7 Mobiles
Ability to Auto initiate Voice Calls
Ability to Auto control outputs
Battery Level Monitoring
Towing Alert
G Force Wake Up Sensor
Speeding Alert
Excessive Idle Alert
GPS Odometer Reading
And much much more...
