

CORPORATE & GOVERNMENT SOLUTIONS

ALL YOUR OPERATIONAL DATA. AS ONE.

Telematics, video, assets, compliance, car pooling, and field operations in one integrated platform.

IntelliTrac **i cubed** connects fleet management, utilisation, driver safety, compliance, shared mobility, and operational visibility in one practical platform built for corporate and government operations.

| Connected operational intelligence for corporate and government teams.

PLATFORM OVERVIEW

ONE PLATFORM. MULTIPLE OPERATIONAL OUTCOMES.

One source of truth for fleet, drivers, assets, safety, utilisation, and field operations.

Most organisations manage critical operational data across too many systems. IntelliTrac i cubed brings telematics, video, compliance, car pooling, asset visibility, and industry workflows together in one practical operational intelligence platform.

EXAMPLE INSIGHT

- Fleet size: 19 vehicles
- Peak utilisation: 9 vehicles
- Recommendation: dispose 10 vehicles
- Immediate cash return: \$225,000
- Estimated annual savings: \$65,400

OPERATIONAL OVERVIEW

PLATFORM BENEFITS

- Single source of truth**
Combine all operational data in one platform for better decisions.
- Operational efficiency**
Automate processes and reduce manual work across the business.
- Stronger safety**
Proactive insights and AI tools help prevent incidents.
- Cost optimisation**
Improve utilisation and reduce unnecessary operational costs.
- Scalable by design**
Grow with confidence across vehicles, assets, and teams.

FLEET MANAGEMENT

TURN FLEET DATA
INTO BETTER
DECISIONS

Improve utilisation, reduce wasted kilometres, and support better lifecycle decisions.

From live tracking and journey replay to alerts, dashboards, and management reporting, IntelliTrac gives fleet teams the visibility they need to make better operational and financial decisions. Identify underused vehicles, improve allocation, and manage fleet performance with greater confidence.

PRODUCTS

-  Easy OBD EP23
-  Edge ES810
-  IT300 Elite
-  Elite EP23

FEATURES

-  Live tracking
-  Journey replay
-  Alerts & notifications
-  Dashboards & reports
-  Maintenance reminders
-  Driver identification

IDEAL FOR

-  Corporate fleets, transport, government, and service vehicles

Optimise utilisation

Identify underused vehicles and improve allocation.

Reduce costs

Cut wasted kilometres and lower operating costs.

Mitigate risk

Stay compliant and act on issues in real time.

Plan with confidence

Use data insights to support smarter lifecycle decisions.

DRIVER SAFETY & VIDEO TELEMATICS

PROTECT DRIVERS, VEHICLES, AND REPUTATION

Turn visibility into coaching, evidence, and safer fleet performance.

IntelliTrac video telematics combines AI, live video, incident evidence, and in-cabin coaching to help organisations improve driver behaviour, respond faster to events, and reduce risk across the fleet.

COMPLIANCE

MAKE COMPLIANCE PRACTICAL, VISIBLE, AND AUDITABLE.

Digitise checks, declarations, and records across daily operations.

IntelliTrac combines apps, workflow tools, and operational controls to reduce paperwork, strengthen accountability, and support everyday compliance.

By moving pre start checks, driver ID, and field records into one connected environment, organisations improve consistency and create stronger audit trails.

Compliance Summary	
Pre starts (today)	12 / 12
Defects reported	0

INCLUDES

Pre Start App

Driver ID

Compliance workflows

Field messaging

BENEFITS

Reduce paperwork

Improve accountability

Strengthen records

Support day to day compliance

Supports regulated telematics and compliance workflows

NHVR approved Electronic Work Diary solution available

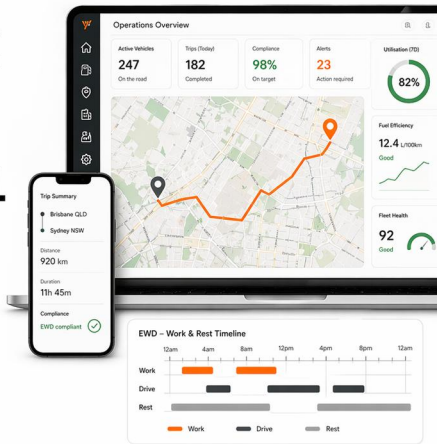

COMPLIANCE & REPORTING

COMPLIANCE THAT ALSO DELIVERS COMMERCIAL VALUE.

Improve substantiation, reduce manual effort, and strengthen reporting integrity.

IntelliTrac supports Electronic Work Diary workflows, FBT reporting, Fuel Tax Credits reporting, and mass management. This helps finance, fleet, and compliance teams work from cleaner operational records with better supporting data.

**CAPABILITIES**

- NHVR approved Electronic Work Diary solution
- FBT reporting
- FTC reporting
- Manual and automatic mass workflows

FBT REPORTING

\$1,248,600
FBT Value (YTD)

- Logbook substantiation
- Private use calculations
- ATO aligned reporting

FUEL TAX CREDITS (FTC)

128,450 L
Eligible Litres (YTD)

- Accurate fuel usage capture
- Jurisdiction aligned claims
- Audit-ready reports

BENEFITS

- Better trip classification
- Better claim substantiation
- Reduced manual effort
- Stronger reporting confidence

MASS MANAGEMENT

96%
Mass compliance

- Mass data capture & storage
- Overmass alerts & trends
- NHVAS aligned reporting

REPORTING & EXPORTS

43
Reports generated (7D)

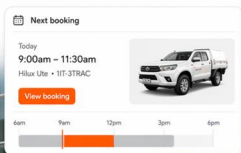

- Custom reports & dashboards
- Scheduled distribution
- Export to finance & ERP

SHARED FLEET

MAKE SHARED FLEET SIMPLE, ACCOUNTABLE, AND HIGHLY UTILISED.

Get more value from fewer vehicles through better booking, access, and control.

IntelliTrac brings bookings, access, telematics, and accountability together for shared fleet environments. Whether using Keyless Go, RFID, or integrated key cabinets, organisations can simplify access while improving utilisation and governance.

Keyless Go, RFID, or key cabinet options.

Better utilisation

Real-time visibility drives higher usage.

Low risk

Stronger governance, audit trails, and accountability.

ASSET VISIBILITY

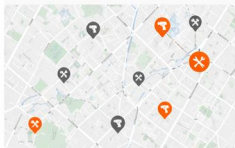

**EXTEND VISIBILITY
BEYOND THE VEHICLE.**

Track tools, mobile assets, and temperature sensitive environments with better accountability.

IntelliTrac Telematics Tag extends the i cubed platform into the broader operational environment. Track tools and mobile assets, add ambient or probe based temperature visibility, and see which vehicle or operator last used an asset.

TRANSPORT & LOGISTICS

A BETTER CONNECTED TRANSPORT OPERATION.

Bring visibility, compliance, safety, and dispatch control together in one transport environment.

Transport operations need more than location tracking. IntelliTrac combines telematics, video, fatigue workflows, pre starts, mass management, and route visibility to help operators create a more connected and better controlled transport environment.

WASTE MANAGEMENT

FROM BIN LIFT TO
BACK OFFICE, SEE
THE WHOLE SERVICE.

Improve service proof, route visibility,
issue capture, and operational response.

IntelliTrac supports waste operations with route visibility, in vehicle workflows, navigation, issue capture, and operational reporting.

From the cab to the office, teams gain stronger service visibility and better evidence for customer response.

KEY CAPABILITIES

- Residential bin collection
- Public litter bin collection
- Route guidance
- Issue logging
- Video linked evidence
- Reporting

BENEFITS

- Prove service delivery
- Reduce disputes
- Improve route performance
- Support customer response teams

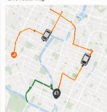

Waste Operations Overview

Route performance

Route	Progress	Stops	On time
Route 12A	64%	348/540	95%
Route 12B	89%	512/575	92%
Route 7C	77%	233/330	90%
Route 5D	54%	182/335	82%
Route 9E	100%	401/401	98%

Live route map

Real-time visibility
See vehicle locations, progress, and issues as they happen.

Capture and prove
Link photos and video to stops and issues for stronger evidence.

Action issues faster
Log issues in the field and notify teams for quicker response.

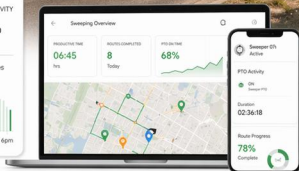

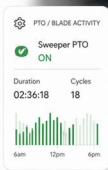

Smarter operations
Access reporting and insights to improve routes and outcomes.

SWEEPING & MOWING

TURN SPECIALIST
PLANT INTO
MEASURABLE SERVICE
DELIVERY.

Move beyond movement tracking and understand productive operational activity.

Specialist fleets such as sweepers and mowers require dedicated visibility into productive work, route activity, PTO events, and field issues. IntelliTrac helps councils and contractors create stronger accountability and evidence of work completed.

KEY CAPABILITIES

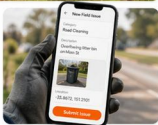

- PTO activity visibility
- Productive time reporting
- Route control
- Driver ID
- Field issue capture

BENEFITS

- Measure productive time
- Improve accountability
- Improve route control
- Capture issues while crews are on site

FIELD ISSUE WORKFLOW

Measurable productivity
Understand true productive time not just engine hours.

Efficient service delivery
Follow routes and ensure areas are serviced as planned.

Evidence of work
Provide clear records for compliance and reporting.

Stronger communities
Cleaner streets and parks mean better outcomes for residents.

LOCAL GOVERNMENT

ONE PLATFORM ACROSS COUNCIL FLEET, PLANT, AND FIELD SERVICES.

Connect departments, simplify visibility,
and improve governance.

IntelliTrac supports local government across fleet and plant, waste, parks and gardens, compliance, city cleaning, infrastructure and maintenance, transport, and car pooling. Councils get a more connected platform for planning, accountability, and service delivery oversight.

UTILITIES

SAFER, SMARTER
FIELD OPERATIONS.

Improve worker safety, asset visibility,
and field control across dispersed networks.

Utility organisations need remote visibility, worker safety, and asset awareness across dispersed environments. IntelliTrac supports these needs through telematics, worker safety options, personal trackers, fuel visibility, compliance workflows, and asset tracking.

BENEFITS

Improve safety

Increase productivity

Protect assets

Strengthen compliance

Personal safety tracker Active

-
- SOS alert
 - Fall detection
 - Lone worker
 - Location sharing

Protect field staff

Keep workers safe with lone worker tools and SOS alerts.

See remote operations

Live visibility across vehicles, crews, and field activities.

Track assets better

Know where assets are and how they're performing.

Respond faster

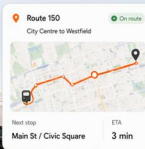

Detect issues, send teams, and resolve with confidence.

PUBLIC TRANSPORT

VISIBILITY AND CONTROL FOR BUSES AND COACHES.

Support safer, more reliable passenger operations with better route and driver visibility.

IntelliTrac helps bus and coach operators improve route visibility, driver oversight, safety workflows, and operational control. By connecting telematics, pre-starts, journey replay, and reporting, operators gain a more reliable and accountable passenger transport environment.

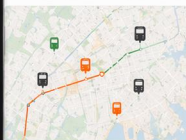

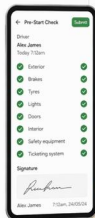

KEY CAPABILITIES

- Route visibility
- Driver behaviour analysis
- Safety pre-starts
- Journey replay
- Reporting & alerts
- Video options

BENEFITS

- Safer journeys
- On-time performance
- Better driver accountability
- Stronger passenger confidence

Bus fleet overview

Routes on time (This week)

Journey replay

See routes live

Track buses in real time and know where they are, so passengers stay informed.

Monitor driver performance

Identify trends, coach drivers, and improve every journey.

Respond to incidents

View alerts, replay trips, and act quickly to keep passengers safe.

Improve service reliability

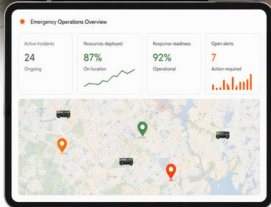

Reduce delays, manage disruptions, and deliver better service outcomes.

EMERGENCY SERVICES

**BUILT FOR
HIGH CONSEQUENCE
ENVIRONMENTS.**

Mission-critical visibility, resilience,
and operational confidence.

Some environments demand more from telematics. IntelliTrac supports higher-consequence use cases with secure infrastructure, stronger situational visibility, specialised integrations, and a platform approach designed for demanding field conditions.

**BUILT FOR**

Secure infrastructure

Mission-critical visibility

Specialised integrations

Operational confidence

Purpose-aligned capability

WHY IT MATTERS

Faster situational awareness

Stronger operational confidence

Better field coordination

Greater resilience

**See more in real time**

Live visibility across incidents, assets and locations.

**Coordinate resources**

Assign crews and equipment with clarity and speed.

**Support response teams**

Keep teams informed in the field with the right information.

**Operate with confidence**

Rely on secure systems built for critical environments.

ROADSCAN AI

MODERNISE MUNICIPAL ROAD INSPECTIONS WITH AI.

Continuously detect, classify, and prioritise road defects in real time using AI enabled in vehicle computing.

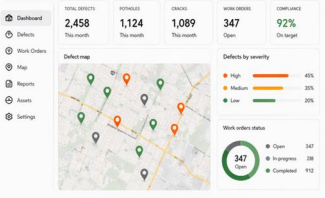

IntelliRoads Road Scan AI modernises municipal road inspections by using AI enabled in vehicle computing to continuously inspect and classify road defects in real time, then push results to the cloud and into Hawk Telematics for action. Instead of relying on infrequent manual surveys and community reports, councils can fit cameras to vehicles already traversing the network, such as garbage trucks, buses, and service vehicles, to capture road condition data every day. One example cited achieved more than 90 percent network coverage in two weeks. Road Scan AI detects defects early, prioritises by severity, and supports filtering by defect size to generate work orders, shifting maintenance from reactive to proactive and reducing long term repair costs. It also improves safety and risk management by identifying hazards such as potholes, cracked footpaths, and damaged signage before they escalate. Inside Hawk, users get a dashboard of cracks and potholes, can drill into defect images and dimensions, and view precise locations on an interactive map. Users can create, manage, and monitor work orders and repair lifecycles via IntelliTrac Hawk or integrate into council ERP systems such as TechOne.

90%+
network coverage
in two weeks.

Hawk

KEY CAPABILITIES

- AI defect detection
- Real time in vehicle processing
- Cloud connected inspections
- Severity based prioritisation
- Defect size filtering
- Interactive defect mapping
- Work order creation
- Hawk integration
- ERP integration

CLIENT BENEFITS

- Reduce manual inspection effort
- Move from reactive to proactive maintenance
- Improve road safety and risk management
- Improve defect visibility and evidence
- Increase network coverage using existing fleet vehicles
- Support faster and better informed maintenance decisions
- Reduce long term repair costs

DETECT. CLASSIFY. PRIORITISE.

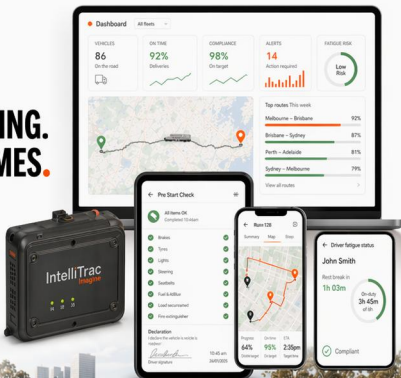

WHY INTELLITRAC

AUSTRALIAN EXPERIENCE. INTEGRATED THINKING. PRACTICAL OUTCOMES.

One platform for fleet, drivers, assets, and operations.

Clients choose IntelliTrac because they want more than a device. They want a provider that understands how to connect hardware, software, workflows, and operational insight into one solution that can scale across real-world fleet and field environments.

WHY CLIENTS CHOOSE INTELLITRAC

- Established expertise since 1987
- Integrated hardware, software, apps, and workflows
- Industry-specific solutions
- Scalable for corporate and government operations
